

Section: Narratives - Needs Assessment

Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the [Return on Investment of Afterschool Programs in Pennsylvania](#) study determined that for every dollar invested in after-school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link to PSAYDN.org](#)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three-part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

Needs Assessment: In this section, LEAs are asked to describe the impact of the pandemic on their students, examine disproportionate impacts on specific student groups, and highlight the LEA's promising practices in supporting students' needs since March 2020.

Indicators of Impact

1. Describe how the LEA identified students for inclusion in after-school programming. Include a brief description of the indicators used in the decision-making process.

Our after-school program runs in our Kelly Elementary School and we serve our Lewisburg Students, ages 5-15. We have operated our program for a number of years and provide quality after-school tutoring, care and supervision, and appropriate play and learning activities. Our program is open to all students whose parents opt to enroll them in our program. For many students this supports their learning and the completion of homework assignments. For others the program allows for parents to complete their employment responsibilities with the certainty that their children are supervised in a safe and well-known location.

Section: Narratives - After-school Program

After-school Program Questions: In this section, LEAs are asked to describe the activities they have designed to provide after- school programming for their students.

2. Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Children from Low-Income Families	Academic Growth	50	We serve our students from our school year and therefore have learning plans that include needs and areas of focus-early reading/math/writing skills balanced with play and learning activities
Major Racial and Ethnic Groups	Academic Growth	15	We serve the students from our school year and therefore have working awareness of their learning needs and we key on literacy and math skills as well as enriching their learning with local field trips and recreational activities

3. Describe the evidence-based resources that will be used to support student growth during the after- school program.

Our evidence based resources include our school-based elementary math and reading materials, our iPad applications that we utilize during the school year, and lots of play based learning resources. We also have children participate in the summer reading program through our local library and educational field trips are taken each week to enrich experiences, building

background knowledge for all children participating.

4. Describe the staff that will provide the after- school program (i.e., Internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role
10	Internal	Our staff include many of our school year para-professionals and teachers.

- a. **The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.**

- b. **The LEA assures it understands it is responsible to ensure that all after-school program staff hold the appropriate certifications for the program that is being delivered.**

5. How will the LEA assess the success of the after-school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Pre/Post Survey to Parents	Twice	Parents share their ideas as we plan for summer and then we always ask them to assess their children's experiences at the close of the 10 week session.
Anecdotal Feedback - children	Ongoing	Children can choose activities/ learning activities and share their ideas and learning with staff

Tool Used to Evaluate Success	Frequency of Use	Expected Results
--------------------------------------	-------------------------	-------------------------

6. How will the LEA engage families in the after-school program?

Families are engaged throughout the summer program. Parents transport to/from the school. Parents are given newsletters highlighting the schedule, the activities, associated costs. The school district advertises the program and actively supports families in the enrollment process.
